DETAILED ACTION

Applicant response filed 12/18/2008 is acknowledged.

Interview summary: In a telephone conversation with B.J...Sadoff attorney for the applicant, on 01/14/2009, errors in the previously presented Restriction/Requirement filed 11/19/2008 were discussed. Examiner agreed to present a new Restriction/Requirement including the pending withdrawn claims. Accordingly, previously presented Restriction/Requirement is withdrawn.

IDS: Presently considered and previously considered IDS documents are attached.

Priority Document: Acknowledgement is made of a claim for foreign priority. Also see Office Action Summary.

Applicants Remarks pertaining to previously presented rejections will be responded after action on this Election/Restriction.

In view of Applicants remarks upon further consideration, a new Election/Restriction is hereby made in accordance with CFR § 1.142 Requirement for restriction, which states that .requirement will normally be made before any action on the merits; however, it may be made at any time before final action.

Claims 1-4, 6-9, 11, 12, 31, 34, 37-39, 44-49, 51-54 are pending.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claims 31, 34, 37-39, 44-49, 51-54 are drawn to compounds of formula I wherein the variables R3, L1 or R6 and the variables layered on top of these variables do not contain heterocyclic moieties.

Group 2, claims 31, 34, 37-39, 44-49, 51-54 are drawn to compounds of formula I wherein the variables R3, L1 or R6 and the variables layered on top of these variables contain heterocyclic moieties. If this group is elected, election of a single disclosed species is required. Further restriction, depending on the heterocyclic moiety corresponding to each of the variables would also be required.

Group 3, claim(s) 1-4, 6-9, 11, 12, drawn to pharmaceutical method of treating diseases using compounds of Group 1.

Group 4, claim(s) 1-4, 6-9, 11, 12, drawn to pharmaceutical method of treating diseases using compounds of Group 2.

The inventions listed as Groups 1-4 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invariable unit present in all the groups that is common to all the structural possibilities is

This structural unit is not a contribution over the prior, because it is found in thiophenol (CAS Number: 108-98-5) which is well known in the prior art (see abstract of US 3519584).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result**

in a loss of the right to rejoinder. Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
